Founding FE engineer on Rumour (later FE lead) + Autonome. Shipped features across Wizard/RaaS, AVS-aaS, 8004scan, AltLLM, AltClaw + the internal MCP platform with the product team (FE, BE, design) - Figma to production.
 MCP platform (de-facto lead) - Next.js → stateless Hono migration without breaking the public API; collapsed ~400 raw tools → ~20 router-orchestrated tools across swap, staking, lending, DEX, wallet, bridge, prediction.
 Rumour (FE lead) - shipped from one React + Vite codebase as PWA + Farcaster Miniapp + LINE DappPortal; Hyperliquid perps; OKX + LI.FI bridging; Privy embedded wallets.

Founding engineer · Limitless Exchange - prediction markets on Base.
 Built backend with NestJS, Fastify, Prisma, PostgreSQL - domain-driven services targeting Base Mainnet / Sepolia / UAT / local from one codebase. Hardhat + Foundry coverage for the Conditional Tokens Framework lifecycle; Envio indexer + Slack/Discord trade-alert bots.
 Automated end-to-end market creation across FE → API → contract → Gnosis Safe multisig; collapsed a manually-assembled flow into a single operator action.
